JANIDU KASUNTHA

Full-Stack & AI/ML Engineering Intern Candidate | BSc (Hons) Information Technology, AI Specialization
Kiribathgoda, Sri Lanka | +94 70 494 9031 | janidukasuntha123@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Information Technology undergraduate specializing in Artificial Intelligence, with hands-on experience designing, building, and deploying full-stack and AI-powered applications using React, Node.js, Express, FastAPI, and large language model APIs (Google Gemini, Groq). Proven track record of shipping production systems serving real users, including a healthcare platform processing 200+ daily API requests at a 98% success rate and a machine learning model achieving 91% predictive accuracy on 75,000+ patient records. Seeking a Software / AI / Machine Learning internship to contribute to production-grade engineering while deepening expertise in scalable system design and applied AI.

TECHNICAL SKILLS

Languages & Frontend: JavaScript, React, React Native, HTML5/CSS3, Tailwind CSS, Python
Backend & APIs: Node.js, Express, FastAPI, ASP.NET, Spring Boot, REST API Design, C#, Dart, TypeScript, Flutter
AI /ML : NumPy, Pandas, Scikit-Learn , PCA, EDA, Data Preprocessing, Groq/Gemini API, Multi-Agent Systems, Prompt Engineering
Databases: MongoDB, MySQL, PostgreSQL
Tools & Deployment: Git, GitHub, Postman, Vercel, Railway, Netlify, JWT Auth, Cloudinary, Jupyter / Colab , Docker,Swagger

PROJECTS & APPLIED EXPERIENCE

NCC eCare — Smart e-Channeling Platform | Lead Developer *2026 – Present*
Full-Stack Web Development · Healthcare Technology | GitHub : https://github.com/JaniduKasuntha/NCC-eCare-Platform

- Directed development of a multi-service healthcare platform (React, Node.js/Express, FastAPI, MySQL) supporting end-to-end patient appointment scheduling.
- Built an AI-powered Medical Report Explainer combining EasyOCR text extraction from PDF/image scans with the Google Gemini LLM API to translate clinical terminology into plain language for patients.
- Optimized a RESTful API to handle 200+ requests daily at a 98% success rate; integrated the PayHere payment gateway and Google reCAPTCHA v3 to secure patient data.

Gini — LLM-Powered AI Chatbot | Developer *2025 – 2026*
LLM Integration · Real-Time Systems | GitHub : https://github.com/JaniduKasuntha/Groq_Nix_ChatBot.git

- Designed and deployed a production chatbot (React, Node.js, Express, Groq SDK) using Server-Sent Events for real-time response streaming.
- Implemented token management and context-window optimization to control inference cost and preserve conversational coherence across sessions.
- Shipped to production on Vercel, owning the full request lifecycle from client to LLM API and back.

Heart Disease Risk Prediction — Machine Learning Model *2025*
Machine Learning · Healthcare Analytics

- Built an end-to-end ML pipeline using a CatBoost Classifier to predict cardiovascular disease risk from 18 clinical markers, reaching 91% accuracy on 75,000+ patient records.
- Applied PCA and data preprocessing to balance the dataset and improve model generalization.
- Deployed an interactive Streamlit dashboard with live risk-probability scoring, color-coded gauge indicators, and automated CSV clinical report generation.
- Performed data analysis to examine feature distributions, relationships patterns and calculate the performance matrixes.

TrailWise: Smart Tour Management & AI Booking Platform | Full-Stack Developer *Present*
AI Agent based full stack system | GitHub : https://github.com/Hasanga910/TrailWise

- Developed an AI multi-agent booking coordinator using the Groq LLM API (Llama 3) for preference extraction and proposal summaries, with rule-based approvals and automatic fallback if the LLM fails.
- Implemented payment verification, booking lifecycle automation and SMS notifications (Notify.lk), backed by 500+ automated tests, GitHub Actions CI and Docker Compose.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT), Malabe *Jan 2023 – 2028 (Expected)*
BSc (Hons) in Information Technology, Specializing in Artificial Intelligence — GPA: 3.5 / 4.0

Nalanda College, Colombo *2010 – 2023*
GCE Advanced Level (Commerce); GCE Ordinary Level

AWARDS & ACHIEVEMENTS

- 3rd Place, Code Night Hackathon | Designed, built, and deployed 4+ full-stack and AI-powered web/mobile applications from concept to production

LANGUAGES

English (Professional — British Council Certified) | Sinhala (Native)
